EDUCATION

Harvard College - Mechanical Engineering

Class of 2028 | Third-year undergraduate

Cambridge Rindge and Latin School | Class of 2024

EXPERIENCE & LEADERSHIP

Research Assistant | Harvard Rowland Institute

Part-time; began during senior year of high school

Undergraduate research in the electrical engineering laboratory of Winfield Hill and Professor Paul Horowitz.

Engineering Intern | SpaceX

Fall 2025

Vice President | Harvard Undergraduate Robotics Club

Harvard College

Student robotics leadership; project portfolio includes the HURC Mars rover.

Midshipman | BU-MIT NROTC Consortium

Alongside Harvard undergraduate studies

Captain of Mechanical Design | CRLS FIRST Robotics

2023-2024

Taught and mentored a group of 25 students working toward a competition robot. Also served as an engineering teaching assistant, including project-based instruction for six students.

SELECTED ENGINEERING PROJECTS

Budget e-bike conversion kit | Independent project

2023-2024

Designed custom brushless motor-control electronics, Bluetooth interface, and a printed enclosure. Iterated through 50+ PCB attempts; tested an experimental printed motor and identified thermal limitations.

Desktop CNC / PCB mill | Independent project

2021-2023

Designed and built a low-cost machine for PCB fabrication. Produced double-sided boards and learned the limits of in-house manufacturing for dense electronics.

Mini Cybertruck go-kart | Independent project

2017-2024

Developed a steel-frame vehicle with electronic steering and remote-control capability. Designed a starter-generator transmission with printed components and one-way bearings.

TECHNICAL SKILLS & INTERESTS

Design & fabrication: Onshape, Fusion 360, FDM/SLA printing, CNC milling, welding, carpentry.

Electronics & software: PCB design, soldering, Arduino, motor control, C/C++, Python.

Languages & interests: English and Spanish; violin, hiking, canoeing, and running.
